Healthcare Innovations (HCI) from Arizona took possession of 4 new Type II Demers LT2 ambulances

June 08, 2011 – Beloeil, Quebec

HEALTHCARE INNOVATIONS – 4 NEW TYPE II DEMERS LT2

Healthcare Innovations (HCI) from Arizona took possession of 4 new Type II Demers LT2 ambulances this year so far.

The service is happy to report the very aerodynamic Demers profile gave them almost 20 plus mile per gallon on the trip from the factory to home base in Arizona.

Healthcare Innovations, Inc is the Ambulance Company serving the emergency needs of residents in Benson, Tombstone and Willcox and along the I-10 corridor from Benson to the New Mexico state line.

They also serve the inter-facility transport needs of the hospitals of Northern Cochise County. To know more about the HCI www.hciaz.com and Demers Ambulances www.demers-ambulances.com.
